TO INSPIRE IS OUR MISSION

PERFECT8 Technologies are dedicated to producing ultra exclusive design loudspeakers for the real connoisseur. Every detail of a PERFECT8 loudspeaker serves one ultimate purpose - perfect musical reproduction. Fill your senses with the purity of the music exactly the way it sounded at the time of recording.

PERFECTION BY DESIGN

There is a passion behind every PERFECT8 product! Timeless design, superior craftsmanship, and outstanding sound quality - all unsurpassed milestones of excellence.

THE CUBE SYSTEM

Enter your private jazz club where your favorite singer materializes holographically and sings with a rich and husky voice, carried by the strong, eager contrabass and the wisper from the drums. THE CUBE is an incredible performer with unique appeal, personality and charm – you will simply not believe that such a tiny speaker can be the source of such a grandiose experience.

THE CUBE is the smallest member of the PERFECT8 product family. The appealing design of THE CUBE seems to contradict it's stunning performance. As with all PERFECT8 products there are zero trade-offs – only a perfect synthesis of science and art.

THE CUBE system is the ideal choice for achieving a superior listening experience when there are design, size and/or placement constraints. THE CUBE will also excell as a center and/or surround speakers in a home theater system.

Created from the same superior quality super silent glass (SSG) as all of the PERFECT8 product line, featuring our exclusive scratch resistant Diamond Gold, and 10 inch precision kevlar/glass/carbon fiber composite cone woofers with ultra linear magnetic drive, the naturalness and energy output from THE CUBE defies belief – simply awe-inspiring!

SPECIFICATIONS:	FRONT	SUBWOOFER
Sensitivity (2.83V):	86dB SPL @ 1m	88dB SPL @ 1m
Impedance:	4 ohms	3 ohms
Overall frequency response:	20Hz-30kHz (+/- 1dB from target response, acoustic 12dB/octave L/R high pass, -6dB at 20Hz anechoic 4pi)	
Typical THD:	< typically 0.3% throughout midrange at 96dB SPL	
Power Handling:	Long term max:	140W 500W
	Short term max :	400W 1000W
	Max Impulse:	1000W 2000W
Recommended room size:	10 – 200m2	
Size (WxHxD):	140x180x190 mm	250x390x390 mm
Mass (approx.):	6kg / channel	30kg

Treble: Long throw 28mm ultra high quality silk dome with large coupled volume ensuring low resonant frequency. Designed and built in-house to eliminate structural and cavity resonances.

Midrange: 2 (per Cube): 5 inch Magnesium-Cones with ultra linear magnetic drive. Resonances and energy storage are well outside the pass band.

Bass: 2 per channel: Extra long throw 10 inch cones with ultra linear magnetic drive. A 400W subwoofer amplifier supplied with each unit.
