

Music Sculptures of Glass and Gold

PERFECT8 TECHNOLOGIES INTRODUCES THE FORCE CENTER LOUDSPEAKER

LINKÖPING, Sweden - November 2007 | PERFECT8 Technologies, provider of high-end ribbon and dynamic loudspeakers and subwoofers, introduces a revolutionary center glass loudspeaker setting a new performance benchmark.

The Force Center is the latest addition to the PERFECT8 family of exclusive glass and gold loudspeakers. It performs flawlessly both in a home theater and surround sound setup. An ultra exclusive surround system is created when combined with The Force as front speakers and The Point as surrounds. This all glass surround system is one of a kind in visual appeal and performance. It will immerse you into a movie experience frighteningly close to reality.

“PERFECT8 Technologies is finally able to present a complete range of products for the most discerning surround sound connoisseurs who only want the best”

Jonas Rantilä, CEO PERFECT8 Technologies

The Force Center features a separate mid-range/treble which can be repositioned to three different heights optimized for 4:3 format viewing, 16:9 format viewing, and 5-channel audio listening. The clever construction allows the movie screen to be lowered half way behind the treble for more realistic voice reproduction when watching movies. Rolls are standard for easy relocation between optimal movie and 5-channel audio positions.

PERFECT8 Technologies is a Swedish provider for high-end ribbon and dynamic loudspeakers and subwoofers. Backed by over 25 years of research and more than 5 years of dedicated development, PERFECT8 Technologies was founded in 2005 with the primary mission of producing the most exclusive and best sounding loudspeaker systems in the world!
